Bahamas' athletic future looks bright

With the 2017 IAAF/BTC World Relays now in the history books and The Bahamas penned in to host the event for another two stagings, athletic authorities believe that the country's athletic future is bright. Their decision is based on the talented performances of junior athletes at the World Relays held April 22 - 23 at the Thomas A. Robinson Stadium. Junior athletes from throughout The Bahamas, proved that they have what it takes - with continued training and commitment - to continue building on the foundation set by those before them, including the Golden Girls and the Golden Knights.
